Comments: Are you people crazy?? The probabilities associated with getting the entire nation's nuclear waste to Yucca Mtn without an accident of some sort and exposing innocent people to deadly radiation are greater than zero. Therefore, the entire nation should be up in arms about this ridiculous proposal to cart all of the waste to Nevada. Nevadans are not expendable and we do not want your garbage in our back yard!! Did a hole in your own mountain, say in Washington DC, or New Jersey, or New York or where ever this stuff is coming from and stick it in there!!! Don't haul it clear across the US to Nevada because this state happens tp be sparsely populated. Keep it in your own back yards!!!! We don't want it either!!! This sounds like another fleecing of America story. How many billions of tax payer's dollars have already been wasted on this half-baked idea?? And please tell the former governor of Nevada to please lobby for someone else. He is no longer welcome in Nevada in my book. I say NO NO
